About Me

Junior Computer Engineer with a background in electronics and a strong interest in research and development, data analysis, and IoT.
Experience in multidisciplinary technical environments (Formula Student Driverless) and a proactive attitude toward teamwork, leadership, and organization. Highly motivated to grow professionally and contribute to innovative projects in technology, sport-tech, and sustainability.

Skills

- C, C++, C#
- Python
- Java
- Teamwork
- Problem Solving
- Curiosity

Info

Nationality
Italy

Driver Licence
B

Birthday
5 november 2003
Sassuolo(MO)

Languages

Italiano (madrelingua)

English B2

Experience

MoRe Modena Racing – Formula Student Driverless — **october 2024-july 2025**
Technical Team Member | Modena, Italia

Research and development activities on localization and control systems for an autonomous vehicle within a Formula Student Driverless project.
Involvement in data acquisition and management from multiple sensors (GPS, LiDAR, IMU) for position estimation, odometry and vehicle control support.
Use of sensor data for performance analysis and trajectory optimization, contributing to improved system reliability and efficiency

Decathlon Italia — **october 2023-february 2024**
Sales Assistant | Modena, Italia

Sales and customer service activities.
Teamwork and priority management in a dynamic environment.

Education

Bachelor's Degree in Computer Engineering — **september 2022-february 2026**
University of Modena e Reggio Emilia

Technical Diploma in Electronics and Automation — **september 2017-july 2022**
ITIS E. Fermi – Modena

Additional Activities & Interests

Through more than 14 years of involvement in the Scout movement, I have developed strong interpersonal skills and a solid ability to work effectively in team-based environments. My experience as an active member of the AGESCI Scout association has strengthened my sense of service, responsibility, and problem-solving mindset, particularly in situations requiring adaptability and collaboration.
Sport plays a central role in my life and has significantly contributed to my personal and professional development. I practice and have practiced various disciplines, ranging from triathlon to ultimate frisbee, where I am also involved as a coach.
Over the past two years, I have also developed a strong interest in 3D printing, materials, and prototyping. This has allowed me to explore hands-on experimentation, rapid prototyping, and design-oriented problem solving, with a growing focus on applied R&D and sustainability.
Alongside sports and technology, I am passionate about photography and videomaking. I enjoy capturing meaningful moments and sharing experiences through visual storytelling.
